

# How to get the most out of this course

Hello again!

- I assure you, you would learn a lot from this course. But as we go, make sure to do what I do, say what I say you should say 😊, and go ahead and code along with me. For exercises, take out time and pause the video, try to do it by yourself, and then watch how I solve it and compare it with yours. And still don't give up if you couldn't do it.
- In case you have errors after carefully rechecking you wrote the right thing, google the exact error message, and most of the time you'd find the solution. Google should be your friend as you go... He's mine too 😊.
